

List of Page Holder

Page holder is a page that holds the temporary data in order to pass the data to other pages

All of the page holders are listed as below:

- createinvoicedata.dart
- invoicedetaildata.dart
- boqdata.dart
- companydata.dart
- userdata.dart
- trackpudata.dart
- userleveldata.dart

List of Unused Page

All of the unused page are listed as below:

- assignboq.dart
- viewboqspecific.dart
- All of the file inside PU Folder
 - trackpu.dart
 - trackpudata.dart
 - viewpu.dart
 - viewpustatus.dart
 - viewtrackpu.dart

Limitations and Future Development / Improvement

Limitations:

- Forget password is unable to send OTP email Change can be done here to make sure email can be sent.. The reason is undetermined but changes should be done before release
- Do changes on PHP files (createinvoicepu.php, reprintinvoice.php) to retrieve back work_code instead of work_id.
- Issue invoice page should have more information on each card (grouped up work_code with the same file_num and main_con). Right now only has file_num to show but can add the main_con name to each card.

Folder description

Folder Name	Description
authentication	Folder that hold all the files related to the authentication
css	Folder that hold all the files related to the color and font
Invoice	Folder that hold all the files related to the invoice section
model	Folder that hold most of the files related to the function
Payment	Folder that hold all the files related to the payment section
PO	Folder that hold all the files related to the PO (BOQ)
Profile	Folder that hold all the files related to the user profile
PU	Folder that hold all the files related to the PU
UserLevel	Folder that hold all the files related to the user level

File description

Authentication

File Name	Description
login.dart	Login page of the application
reset_password.dart	Reset password page of the application
signup.dart	Sign up page of the application

Invoice

File Name	Description
createinvoice.dart	Create invoice page of the application
createinvoicedata.dart	Page Holder for invoice generation
deleteinvoice.dart	Delete invoice page of the application
invoice.dart	PDF preview page when creating the invoice
invoicedetaildata.dart	Page Holder for invoice detail
reprintInvoice.dart	Regenerate PDF page
viewinvoice.dart	View all of the created invoice page of the application
viewinvoicedetail.dart	View invoice detail page of the application
viewinvoicestatus.dart	View invoice status page of the application

Model

File Name	Description
createInvoiceFunction.dart	Page that hold the PDF generator function
createInvoiceModel.dart	Page that hold the class objects needed for creating PDF
model.dart	Page that hold most of the class objects needed for different item
recreatepdffunction.dart	Page that hold the PDF regenerator function
userpermission.dart	Page that hold the validation of the user permission

Payment

File Name	Description
editspecificpayment.dart	Edit specific payment page of the application
paymenthistory.dart	Payment history page of the application
uploadpayment.dart	Upload payment page of the application
uploadpaymentrtspecific.dart	Upload specific payment page of the application
paymenthistorytest.dart	Test page for payment history page

PO

File Name	Description
assignboq.dart	Assign BOQ to specific person (currently not used)
boqdata.dart	Page Holder for PO (BOQ) information
viewboq.dart	View all the assigned PO page of the application
viewboqspecific.dart	View specific assigned PO page of the application (currently not used)

PU (Currently not used)

File Name	Description
trackpu.dart	Track PU page of the application
trackpudata.dart	Page Holder for holding the PU data
viewpu.dart	View all the PU page of the application
viewpustatus.dart	View PU status of the application
viewtrackpu.dart	View and track PU status of the application

Profile

File Name	Description
changepassword.dart	Change user password page of the application
companydata.dart	Page Holder for holding the company data
companyprofile.dart	Company profile page of the application
profilepage.dart	User profile page of the application
userdata.dart	Page Holder for holding the user data

UserLevel

File Name	Description
assignuserrole.dart	Assign user role page of the application
createuserlevel.dart	Create user level page of the application
edituserlevel.dart	Edit user level page of the application
userleveldata.dart	Page Holder for user permission
userlist.dart	Approve user page of application
viewuserlevel.dart	View user level page of the application

Outside the folder

File Name	Description
homepage.dart	Homepage of the application
main.dart	-
signature.dart	Signature selection page of the application
